<p>(54) Title: A METHOD FOR CONTROLLING TRANSMITTING POWER, AND A CELLULAR RADIO SYSTEM</p> <p>(57) Abstract</p> <p>The invention relates to a method for controlling transmitting power in a cellular radio system comprising in each cell at least one base station (20) communicating with subscriber terminal equipments (21-22) located within its area, in which method the base station measures the power level of a signal received by it from a terminal equipment, and the terminal equipment measures the power level of a signal received by it from the base station, and reports the result to the base station. For enabling fast and accurate power control in the method of the invention, the base station (20) compares the measurement results transmitted by the terminal equipment with its own measurement results, and controls the transmitting power of the terminal equipment and its own transmitting power on the basis of the comparison of the measurement results.</p>

INTERNATIONAL SEARCH REPORT

International application No.

PCT/FI 95/00516

A. CLASSIFICATION OF SUBJECT MATTER

IPC6: H04B 7/005

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC6: H04B, H04Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	EP 0615353 A1 (ALCATEL RADIOTELEPHONE), 14 Sept 1994 (14.09.94), see the whole document, especially the Abstract and claims 1-14 --	1-5

 Further documents are listed in the continuation of Box C. See patent family annex.

- * Special categories of cited documents
- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
